ATLANTIC COAST OBSERVER NETWORK, MD / DE / DC CHAPTER WITH DATA FROM NEARBY AREAS

WINDY MONTH WITH ABOVE NORMAL TEMPERATURES AND BELOW NORMAL SNOWFALL

February was a windy month. Winds of 40 mph or higher occurred on a quarter of the days. Winds felled the National Christmas Tree on the 19th. The strongest winds occurred on the 25th across the region as gusts over 50 mph were common resulting in power outages at some ACON locations. Temperatures that averaged 20 to 29 degrees above normal at the regional NWS sites on the 17th and 18th contributed to the months above normal temperatures. Precipitation averaged around normal but snowfall was below normal.

The first eight days saw seasonal temperatures. The month began wet with some sleet and freezing rain at colder locations that changed to a cold rain. Rainfall amounts on the 1st and 2nd ranged from a half inch in the southeastern areas to over an inch in Carroll and Washington Counties. **Jim Vaughn** of **Smithsburg 3 NE** reported 1.39" and **Eric Glass** of **Emmitsburg 2 SE** 1.22". Strong winds upwards of 50 plus mph followed the storm. Temperatures on the 3rd failed to rise above the mid 30's. The next event occurred on the 5th. Some light sleet and freezing rain fell in colder locations. Precipitation amounts averaged around a quarter of an inch. More light precipitation, mostly liquid, fell on the 7th and 9th. Measurable snow of a few tenths of an inch fell on the 9th. **Brian Smith** of **Oxon Hill** and **Greg Latta** of **Frostburg** each reported 0.5", the greatest amounts in Maryland/Delaware. Just west of Western Maryland in West Virginia **Dave Lesher** of **Davis 3 SE WV** measured 10.9" from the 8th to the 10th.

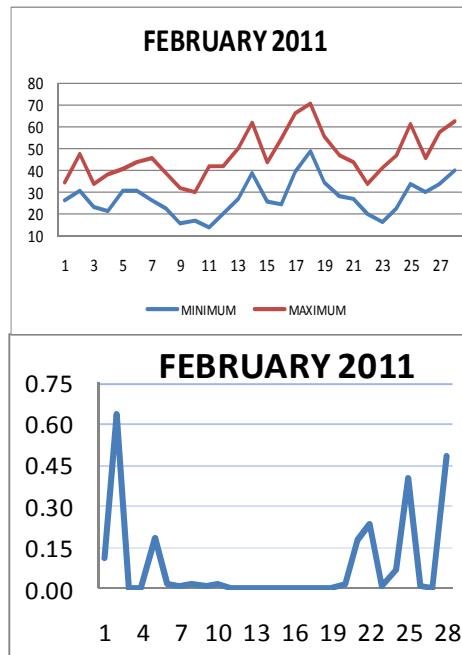

The 9th and 10th were the coldest, average wise, of the month. Temperatures failed to rise above freezing at many locations and at others no higher than the mid 30's.

Little or no precipitation fell from the 11th to the 20th. During this period the first "warm spell" of 2011 occurred from the 13th to the 19th. Temperatures peaked in

the 70's at all but three ACON stations. Record high temperatures in the low to mid 70's occurred on the 18th. **Joe Terry** of **Forest Glen** reported 77°. Minimum temperatures on the 14th failed to fall to 32° or lower for the first time in 77 days at **Smithsburg 3 NE** and 75 days at **Hagerstown 1 E**.

Strong gusty winds ushered in cooler temperatures on the 19th. Winds, which gusted to over 50 MPH, blew over the National Christmas Tree in Washington D.C.

Temperatures fell to near normal on the 20th and to below normal on the 22nd and 23rd. The only general winter precipitation event of the month occurred on the 21st and 22nd. The event was a mixture of liquid and frozen precipitation.

Smithsburg 3 NE, and 6.0" by Max Hutto of Smithsburg 1.5 SW.

The snow cover, clear skies, and calm winds during the night of the 22nd-23rd generated ideal for conditions for low minimum temperatures. **Eric Glass of Emmitsburg 2 SE and Max Hutto of Smithsburg 1.5 SW** each reported **2°**, the coldest temperature of the month. This was one of the few nights these conditions existed this winter.

Morning rains fell and the temperatures rose into the 60's and lower 70's on the 25th before a cold front ushered in strong damaging winds. Winds gusted to over 50 mph at many locations across the region. Over 100,000 customers were without power in the metropolitan Washington DC region.

Much above normal temperatures again returned for the last 2 days of the month. The 28th, the last day of meteorological winter, saw maximum temperatures in the 60's just as the first day of meteorological winter, December 1st, did.
